

A TAG Users Guide for Students

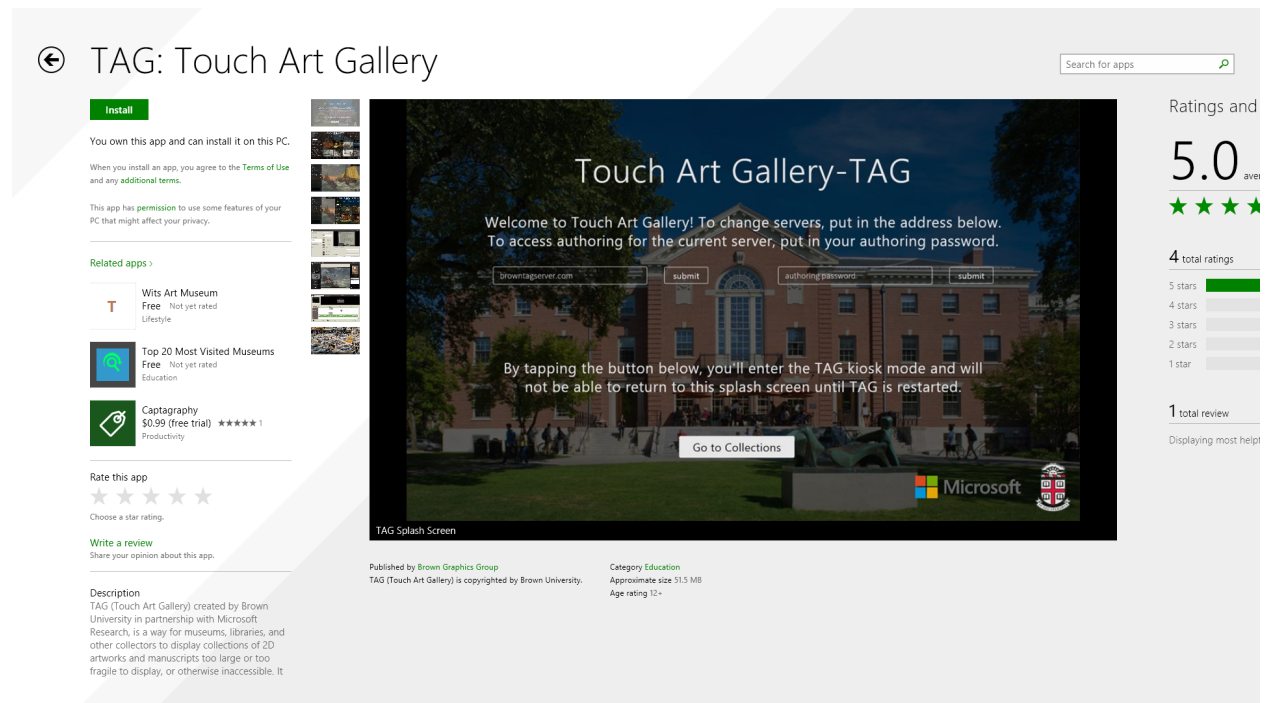

This guide describes the basics of TAG student usage over the course of the semester.

Touch Art Gallery: On Windows 8 and on the Web

Students can choose to access their course content by utilizing the Windows 8/8.1 TAG application or the online version of TAG.

a) Windows 8/8.1 Metro application

If you own a Windows 8/8.1 machine, you will be able to download the TAG-Touch Art Gallery application from the Windows App Store. You can download the app by searching “Touch Art Gallery” in the Windows 8 App Store.

Click on the “Install” button and you should have the Touch Art Gallery application in no time!

b) TAG web application

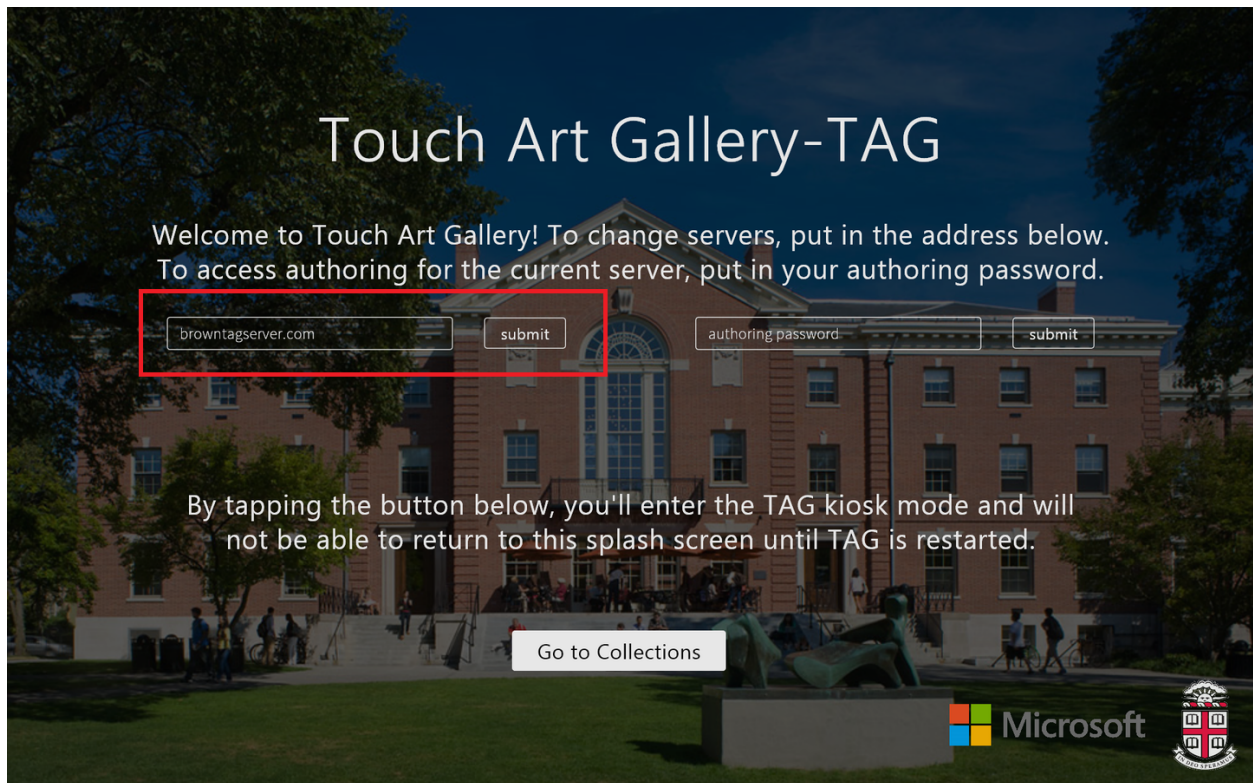

The Touch Art Gallery application is supported the latest versions of Chrome, Firefox, Internet Explorer and Safari. There are several ways to get access to a TAG webapp. If your instructor has explicitly stated that the Touch Art Gallery application will be located on a directed course or departmental website, please navigate to the indicated pages. Bear in mind that there are three networks that affect TAG server access:

- CIT CS network - cannot access the TAG servers through ethernet. Must use wireless or VPN
- Non-CIT Brown - can access TAG servers through ethernet, wireless, and VPN
- Outside Brown - must use VPN to access TAG servers through either wireless or ethernet.

If the TAG webapp is not available on a course related website, you can navigate to <http://cs.brown.edu/research/ptc/tag/webapp.html>. You will be then be viewing TAG’s general content,

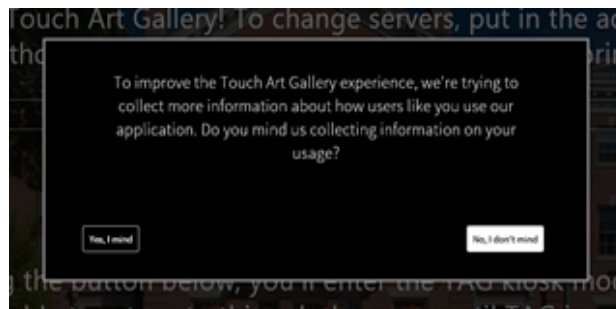

A TAG Users Guide for Students

and not the content created specifically for your course. In order to get your course's content, you'll need to change the server address to the one provided by your instructor. You can do this by putting the server address in the indicated text field:

First Time Users

The first time you open TAG, you will see the following message. The TAG team would like to collect anonymous information about user interactions within the application so that we can improve the experience. You can press “Yes, I mind” to opt out or press “Yes, I don’t mind” to opt in.

Once you're on the right splash screen, hit the “Go to Collections” button to start exploring! Please refer to these video tutorials and the TAG General Users Guide for more detailed steps:
